

USER'S MANUAL

GENERAL INFORMATION

Welcome to the user manual for the Real-Time Driver Drowsiness Detection App. This app is designed to help drivers stay alert and prevent accidents by detecting signs of drowsiness while driving. Please read this manual carefully to learn how to use the app.

INSTALLATION

Install The Real-Time Driver Drowsiness Detection App and after installation, follow the instructions to allow the app access to your device's camera.

APP INTERFACE

The app interface is simple and user-friendly. The main screen displays the instruction page. The app will use your camera to detect your facial movements for signs of drowsiness. Click on the Let's Start button on the instruction page to start the app. When you click the Let's Start button, the app sets the threshold for alerting you when it detects signs of drowsiness.

HOW TO USE

When you start driving, the app will begin monitoring your facial movements for signs of drowsiness. If the app detects signs of drowsiness, it will sound an alert to wake you up and prevent an accident.

TIPS FOR BEST RESULTS

- Position your device in a stable location where it can capture your face movements clearly.
- Make sure there is adequate lighting to allow the app to detect your facial movements.

Disclaimer: The Real-Time Driver Drowsiness Detection App is designed to assist drivers in detecting signs of drowsiness while driving. However, it is not a substitute for safe driving practices. Always remain alert and attentive while driving, and never rely solely on this app to prevent accidents. The app should only be used as a supplemental tool to promote safe driving practices.

Thank you for choosing the Real-Time Driver Drowsiness Detection App. We hope that this user manual has been helpful in explaining how to use the app.
